Safe in Schools Initiative

The Goal

In order to encourage the learning of students, we encourage parents to send their children back to school. School boards are employing only the safest measures, ensuring that no student develops or spreads the coronavirus.

[Safety measures](#) 

The Benefits

By sending children back to school, their learning can continue, without interruption. Through this initiative, numerous new teachers will be accepted, and given a chance to learn how to work with children.

Additionally, parents will be able to return to work in good conscience, knowing their children are completely safe.
